

Hager Engineering is a sole proprietorship in business since 1992. Our current business is 90% for private owners. We specialize in providing local contractors with engineered plans for temporary bridges, temporary support and jacking of bridge members, beam erection plans, special form designs, sheet piling and foundation designs. Other work is residential and light commercial building plans, residential water and wastewater designs, pond design, SWPPP preparation, rehabilitation designs for old buildings.

The principal engineer wants to reduce his work load. We are looking for a graduate civil engineer to work in small engineering firm in Arkport, New York.

Candidate can be a PE or an EIT. Construction experience a big plus. Should be conversant in the most of the following fields:

- Structural engineering
  - Esp bridges
    - AASHTO, AISC
    - Reinforced Concrete
- Hydrology and Hydraulics
  - Pond design
  - SWPPP preparation
- Soils and Foundation Analysis
  - Sheet piling design
  - Foundation design
  - Piling design
- NYS Building Code
  - Residential buildings
  - Commercial buildings
- NYSDOH Codes
  - Residential and light commercial wastewater
  - Residential and light commercial water treatment
- Report Writing Skills important
  - Documentation to various approving agencies

Opportunity for advancement.  
Flexible work hours/location.  
Salary negotiable.
